**And Action, Too!**

## Rayl Food Brings Complaints

By ROBIN BECHTOLD

Beginning with the first college dormitory ever built, dorm food has probably been a topic of general dissatisfaction. The RHA Quad residents who eat at Rayl cafeteria have found themselves no exception. Instead of resorting to idle jokes, a group of students have formed a food committee to take constructive action. This committee meets on Tuesday evenings once a week, to discuss possibilities of improving the food and service.

Each residence house in the Quad has its designated representative. Suggestions or complaints made by the students are given to these representatives.

Feeding over three hundred students three times a day presents understandable difficulties. The residents, however, have come up with very valid complaints of problems which should be possible to resolve.

The cafeteria has recently been running out of food before all students have been fed. As a result, they either wait in line half an hour for more to be prepared, or go hungry. The cafeteria generally serves a choice of two main dishes for supper. This selection should be available to every student, no matter what end of the serving time he has arrived. This is what he pays for in his contract. Favorite foods such as bacon-lettuce-tomato sandwiches,

says the students, are not served enough during the five week cycle of menus. The less popular food has been suggested to be served less frequently, or replaced with a more desirable substitute. The portions of meat at supper are often too small, and it costs extra to have a second portion. Baked potatoes are preferred over noodles, croutons for tossed salads and fresh fruit are

other suggestions.

Cleanliness could also be improved. It is not uncommon to get improperly washed utensils.

It is hopeful that the menu will improve. New menus are drawn up for Rayl in December, for the up-coming semester. The students' suggestions should be seriously considered. The students are paying to eat

at Rayl, and, after all, without them, there would be no need for any cafeteria. Many feel their suggestions and frustrations are not reaching the people who can effectively act on it. Surely someone cares whether Quad residents have proper nutrition and have enough energy to get through a day of school. Too many times they have been told that nothing can be done.

## UMR Ranked Sixth In Grads

SOURCE: OPI

The University of Missouri-Rolla was sixth nationally in the number of graduates with B.S. degrees in engineering during 1975-76 and 13th in full-time undergraduate enrollment. The Rolla campus had ranked seventh in undergraduate engineering degrees granted the previous year and 13th in full-time undergraduate enrollment.

Statistics come from an annual report made by the Engineering Manpower Commission of the Engineers Joint Council. The group surveys almost 300 colleges and universities which grant degrees in engineering.

Results of the survey also show that UMR is first west of

the Mississippi River in the number of engineering B.S. degrees granted and fourth in total undergraduate engineering enrollment. Among engineers graduated in the state of Missouri during 1975-76, 64 per cent with B.S. degrees were graduated by UMR, almost 63 per cent of those with M.S. degrees, and more than 43 per cent of those with doctor's degrees.

In 1975-76, UMR granted 584 bachelor's, 221 master's, 16 doctor of philosophy and five doctor of engineering degrees. This was an increase at both bachelor's and master's degree levels. Nationally, the trend toward decreasing numbers of engineering degrees continued except for M.S. degrees which increased 4.6 per cent. UMR

The St. Pat's Board is already "spreading their green". Recently the Board made a trip to Boy's Town of St. James and donated sweatshirts and ski caps to Boy's Town. Pictured on the left is Mr. Mash, a Boy's Town official. The Board Reps making the presentation are Ed Banovic, Mike Kovack, Dan Angeli, John Diecker, and Rusty Goldhamines. The two young men pictured are Boy's Town residents.

was 18th in the number of M.S. degrees granted.

The largest number of engineering bachelor's degrees were granted by: Purdue University 811; University of Illinois 730; Georgia Institute of Technology 700; University of Michigan, Ann Arbor 682; Pennsylvania State University 619; University of Missouri-Rolla 584; University of California, Berkeley 518; North Carolina State University 510; Texas A. and M. University 497; University of Minnesota 494.

Highest engineering enrollments were reported by: Purdue University 6409; Pennsylvania State University 5468; Texas A. and M. University 4926; University of Illinois 4636; Georgia Institute of Technology 4367; Iowa State University 4050; University of Texas, Austin 3481; University of Michigan 3452; Virginia Polytechnic Institute and State University 3350; North Carolina State University 3105; Ohio State University 3104; University of Puerto Rico 3038; University of Missouri-Rolla 3019.

## Blue Key Encourages Energy Conservation

The special projects committee of the Blue Key National Honorary Fraternity on the UMR campus has designed a new contest to get UMR Miners to think energy conservation. Blue Key proposes to do this by offering four cash prizes for the most realistic and economically feasible energy conservation idea that can be put to use at UMR.

The guidelines for the contest are as follows:

1) All entrants must be part- or full-time students enrolled at UMR.

2) The energy conservation ideas will be judged by a panel consisting of representatives from UMR's Educational and Administrative Staff.

3) All entries will become property of UMR.

4) Ideas will be judged on originality, applicability, cost effectiveness, and clarity and thoroughness of presentation.

5) Prizes will be awarded as follows:

- 1st — \$200.00
- 2nd — \$150.00
- 3rd — \$100.00
- 4th — \$50.00

6) The contest will officially begin November 15, 1977 and end January 15, 1978. All winners will be notified by February 15, 1978.

7) The decision of the judges will be final.

All entries should be mailed to Blue Key, P.O. Box 1331, Rolla, Missouri. Everyone get energy-conscious and submit your ideas for judging. Good luck Miners!

## IFC Challenge

Let it be known that the men of the Inter Fraternity Council, representative of all Greek brothers, do hereby challenge the men of the Board, who are green, to do battle on the gridiron.

Let it also be known that the Greek Gods have smiled upon us and assured us of a victorious battle. The spartan warriors have trained well in the Greek camp and are prepared.

You, of the board, shall set the time and the place to display your vain attempts in gridiron battle. We, the illustrious Greeks, will be prepared to do battle at all times and will rejoice at your acceptance of this challenge.

So let it be.

The Greek Council

# Bullboard

Notices to appear in the Bullboard section should be typed and deposited in the north door of the Miner office by 9:00 p.m. Monday. This will assure publication in the next edition

## ST. PAT'S...

Campus sales are now going on in the University Center from 8:30 till 3:30 every weekday.

## IEEE

IEEE is sponsoring a tour of the McDonnell Douglas Facilities in St. Louis to take place on Thursday, Nov. 10. The tour, which includes the flight production line, leaves at 9:30 a.m. and has a maximum of 40 spaces available on a first come, first served basis. Those interested in attending can sign up between now and Monday in the lobby of the EE Bldg.

## AICHE

The next regular meeting of AIChE, will be November 9 at 7:00 p.m. in Room G-6 of the Chemistry building. The chapter will hold election of officers. All members are urged to come. Refreshments will be served afterwards.

## ORDER OF ENGINEER

Engineering graduates and prospective graduates are cordially invited to join "The Order of the Engineer."

You may choose to participate in either of the two ceremonies which will be held Wednesday, November 9 and Thursday, November 10, 1977, in the Mark Twain Room of the University Center at 4:00 p.m.

There is no cost to participate in the ceremony and receive the printed creed to sign. Should you desire to wear the stainless steel ring as a symbol of the order, the cost is \$5.00 (most do).

Rings may be purchased ahead of time in the School of Engineering Dean's Office, 101 Engineering Research Laboratory. Please go there and order your ring as soon as possible. Any questions can be answered there also.

## BLUE KEY

The first Blue Key leadership forum for this year, will be held November 12th. Any non-affiliated independent that wants to go, contact Brenda Ellerbrake at 341-4987. The first six applicants will be accepted. This is a good opportunity to learn and enhance your leadership knowledge and ability. For further info, call Brenda.

## ALL ORGANIZATIONS

To get your picture in the Rollamo Yearbook you must set up an appointment with Kay Spaunhurst, Organizations Editor. Phone 341-3851.

## EARLY COMMISSIONING NOW AVAILABLE FOR COLLEGE STUDENTS

The Deputy Chief of Staff for Personnel, Department of the Army has just announced that college students who complete the Advanced ROTC requirements can be early commissioned as officers and participate in active Reserves or National Guard while still a college student. Previously, students who had completed their ROTC requirements could not be commissioned until college graduation.

This offers a financial advantage to those students who complete their ROTC requirements prior to graduation. All students will receive \$100 per month subsistence allowance during the last two years of ROTC participation. Those who complete advanced ROTC but have not completed their degree requirements can now be commissioned in the Reserves or National Guard, participate in their monthly drills, and receive an extra \$100 or more per month while finishing college.

This new policy is most advantageous for college students who are veterans or who have had three or more years of Junior ROTC while in high school.

These students can immediately enroll in Advanced ROTC and receive \$100 per month their first two years of college. They then can be commissioned and receive pay as an officer in the US Army Reserve or National Guard their remaining years in college.

Students who are interested in this program should contact MAJ Harris Flanagan, Military Science Department, Bldg T-2, University of Missouri-Rolla, Telephone: 341-4741 or 341-4744.

## GDI MEETING

GDI will hold a general membership meeting tonight (Nov. 3) at 7:00 p.m. in Room 114 C.E. This is an important meeting, and all members are asked to attend. Refreshments will be served afterward.

## COME PARTY WITH GDI

GDI presents a GOOD TIME this Saturday night, with its first Party of the year. The good time will feature your favorite refreshments in great quantities, along with dancing to the latest hit tunes. The music and fun begins at 8:00 p.m., Nov. 5 at Tech-Engine Club. Come on out!

## FREE MOVIE

On Thursday, November 3 at 7:30 p.m. in the ME Auditorium, "Triumph of the Will" will be shown. This film directed by Leni Riefenstahl in 1936 was commissioned by Hitler to record the Sixth Annual Party Congress in Nuremberg. It is a monument of propaganda, a document of the time that exposes the psychology of the Third Reich. FREE.

## TAU BETA PI MEETING

Nomination of officers for the Spring Semester will be held at the Tau Beta Pi meeting on Tuesday, November 8, at 7:00 p.m. in G-5, H-SS. Refreshments will be served.

## PRE-GAME LUNCHEON

A pre-game luncheon for MSM-UMR alumni and friends has been scheduled Saturday, Nov. 12, at the Howard Johnson Motel in Cape Girardeau prior to the football game between the University of Missouri-Rolla and Southeast Missouri State University.

Social hour and buffet luncheon will be held at poolside beginning at 11:30 a.m. Bus transportation to the Miner-Indian game and back to the motel will be furnished.

Cost is \$4 per person and reservations should be made by Nov. 9 with Bob Patterson, Box 573, Sikeston, Mo. 63801.

## WOEEE

UMR Amateur Radio Club WOEEE is holding a very important meeting this Wednesday, October 26 at 6:30. It will be held at the shack (northwest basement of the Rolla Bldg.) for the demonstrations and then hold a business meeting.

## AIAA

Thursday, November 10, the American Institute of Aeronautics and Astronautics will have its monthly meeting in the Physics Auditorium, Room 104. On the program, is Mr. Curtis Grewing, UMR graduate, of McDonnell Douglas Astronautics Company, here to discuss the Harpoon Air-to-Surface Missile being developed for the U.S. Navy. The public is invited to hear this program at 7:00 p.m. in the Physics Auditorium, Room 104.

## IK

There will be a meeting of the Intercollegiate Knights on Thursday, November 3, 1977 at 7:00 p.m. in the Mark Twain Room. All Knights please be present to sign plaques for pages.

## STUDENTS, FACULTY & STAFF

We would like to invite you to a program presented by the Venezuelan Student Association and the International Club, at 7:00 p.m., Nov. 4, in room 104 Mechanical Engineering.

At this meeting we will present two films: THE YOUNG VENEZUELA and CARACAS. Both are in English. Each film lasts 15 minutes and show our people, potential future, educational programs, etc.

In addition to the films you will have the opportunity to learn samples of Venezuelan music, see our native dances, and meet the Venezuelan Consul from New Orleans who will be our guest.

We are looking forward to seeing you there. There is no charge. All are welcome.

## BETTER ERECTIONS

To get your Structural Engineers Make Better Erections shirt, call or stop by the AEPI House on Fraternity Dr. Prices range from \$4.50 to \$5.50.

## ASTRONOMY GROUP - SOCIETY OF PHYSICS STUDENTS

A joint meeting will be held at 7:00 p.m., Thursday, November 3, in Room 104 of the Physics Building. Business of the SPS and Astronomy Group will be discussed. Speaker for the evening will be Dr. J.H. Senne, who will discuss and show slides on the subject of Grazing Occultations. These events occur when the edge of the moon passes in front of a star, giving valuable information on the orbit and geography of the moon.

All UMR students are cordially invited to attend.

## MATES

The Association of Married Students, MATES, will hold their November meeting on Nov. 7, at 7:00 p.m. in Room 105 E.E. Plans for our Progressive Dinner and sports activities will be discussed. A babysitting room and refreshments will be available.

## UGLY MAN DISCO

There will be an Ugly Man Disco at the Alpha Epsilon Pi fraternity on Friday, November 4, starting at 9:00 p.m. Your favorite beverages — 25 to 60 cents a draw. All proceeds will go to Theta Tau Ugly Man.

## STUDENT UNION BOARD

There will be a football tournament starting on Monday, Nov. 21. Sign-ups start on Nov. 7 in the University Center. It will be a best 2 out of 3 doubles competition.

## CANOE RACE

Saturday, Nov. 12. SUB is presenting a canoe race. The race will be held at the Jerome Exit on the Gasconade. Sign-up at 216 Old Student Union or T-9. There will be an entry fee of \$1 and equipment will be provided. First place will be awarded a traveling trophy. Sign-ups end Nov. 5.

## COFFEEHOUSE WITH JOHN BIGGS

Student Union Board will present John Biggs at the University Center-Cafeteria at 8:00 p.m. Saturday, Nov. 12. Free with valid UMR I.D. The music will be folk and blue grass.

## WATER COLOR

Bill McFarland will give a presentation of water color painting on Thursday, Nov. 10, at 7:30 p.m. in the Mark Twain Room of the University Center. McFarland is currently giving a course for the University Extension in water color painting. The presentation is sponsored by SUB.

## BILLIARDS

Monday, Nov. 14, will be the starting of the UMR Billiards Tournament. Sign-up in the Student Union from Oct. 31-Nov. 10. Trophies will be awarded for the 1st and 2nd places in this single elimination tourney. Each match will be the best 2 out of 3 games of eight ball.

## UMRSCC

The Road America mini Can-Am Autocross will be presented by the UMR Sports Car Club this Sunday, November 6, and will be held at Wal-Mart parking lot, located on 63 South. The autocross will be started at 12:30 p.m. so everyone wishing to participate should be there before 12:30 p.m. This will be the last autocross of the fall semester, so everyone wishing to run is urged to come out.

## REFERENDUM

The Student Council will hold a referendum the week of November 14-18. Some of the subjects to be on the referendum include better lighting around the campus, the Student Union's check-cashing charge, and the fee increase scheduled to take effect in the Fall of 1978. Students may receive referendums either from their Student Council representative or in the new Student Union on Wednesday and Thursday, the 16th and 17th of November.

## ATTENTION UMR COEDS!!!

Have you ever wanted to travel to strange places — meet new exciting people — have a chance to project your personality in front of a crowd. If so, an interesting and exciting opportunity awaits you. If you would like more information about basketball cheerleading fill out the form below and turn into Student Council Office by Mon., Nov. 7.

NAME \_\_\_\_\_

ADDRESS \_\_\_\_\_

PHONE \_\_\_\_\_

CLASS LEVEL \_\_\_\_\_

There will be a meeting on Tuesday, Nov. 8th at 8:30 in the Mark Twain Room, University Center to discuss this exciting future. Refreshments will be served and all questions will be answered. For more information look for posters on campus or contact Student Council Office.

## Boyer From Beta Sig Freshman Of The Year

By MARILYN KOLBET

Roger Boyer was named freshman of the year by Theta Tau Omega last week. The award was given on the basis of his achievements last year.

Majoring in nuclear engineering, Roger achieved a 2.4 grade point average. However, Theta Tau was more concerned with his campus activities.

"We don't really get into the subject of grade point when we're deciding," explained Randy White, Theta Tau president. "We are more concerned with finding people who are interested in getting out and involved."

As Beta Sigma Psi's pledge class president, Roger was involved in other activities in

the house such as assistant house project chairman and Greek Week booth co-chairman. He also participated in a variety of intramurals and joined Circle K and the American Nuclear Engineering Society. In Circle K he was secretary-elect and membership chairman.

All of his campus organizations and activities were listed on his application along with his name, grade point and major. Theta Tau started accepting applications four weeks ago. The decision, announced October 26, was made by the whole Theta Tau organization.

Roger heard about the award over the radio and was encouraged by a friend to apply.

"I have always been involved in organizations and activities

in the community since I was in eighth grade and then in high school," stated Roger. "Most of them were service-oriented organizations in high school."

Roger added, "I became involved because there are things to learn from being involved in the different organizations. Also I get to meet more people this way."

This year he has joined one more organization and is still involved in committee work in the organizations he joined last year.

Why does Theta Tau give a freshman-of-the-year award? President Randy White explains: "The main purpose is to pick someone who has gone out of his way to get out and involved on campus."

Roger Boyer from Beta Sigma Psi, Freshman of the Year.  
(Photo by Richardson)

## Bill To Sponsor Potentail Grants

By MICHELLE HALL

There is a bill pending in the U.S. Congress, the Missouri FY 78 State Plan for Title I of the Higher Education Act of 1965, which if passed would provide potential grant opportunities under Title I (Higher Education Act of 1965 Amended).

Programs to be supported under these grants would include community service activities, continuing education programs, and planning for resource materials sharing.

Under community service activities problem categories such as aging, cultural development, economic development, energy, housing, public, management, social services and environment, will be given top consideration.

The principal target groups of community service programs will be local government officials and employees, local Boards and Authorities, and community improvement organizations.

The area of impact will be distributed between the interior regions of the state and urban areas.

In the continuing education programs the target groups will be the same as those for community service programs.

Planned activities for Resource Materials Sharing include organization of the divisions own Title I materials library within the existing administrative budget. The division will also establish relations with the Coordination Board of Higher Education as well as the metropolitan and regional organizations. The purpose of these relationships will be to identify potential program areas for the division.

Out of the total budget the community service division will receive sixty per cent, while the Division of Continuing Education receives thirty per cent and the Division of Planning for Resource Materials will receive ten per cent.

## Miner News Regional Meeting Held

SOURCE: OPI

Approximately 500 chemist, chemical engineers and scientists in related fields are expected to attend the 13th Midwest regional meeting of the American Chemical Society (ACS) Nov. 3-4 at the University of Missouri-Rolla.

Nationally, ACS has more than 100,000 members. Membership in the Midwest region which is made up of chapters in seven states (Arkansas, Colorado, Illinois, Iowa, Kansas, Missouri and Nebraska) totals more than 7,000.

Presentation of about 130 technical papers has been scheduled for the meeting. The participants will be able to listen to the reports of results of research being done in the following areas: analytical and environmental, inorganic, organic and physical chemistry, biochemistry and medicinal chemistry, chemical education and poster sessions. In addition, symposia will be held on "Association Complexes in Solution," "Liquid Crystals and Stability of Disperse Systems," "Chemistry and Mental Functions" and the "Special Symposium on Nuclear Geochemistry" held in honor of the meeting's awardee, Dr. Paul K. Kuroda.

One of the papers to be presented — expected to be of interest to many of the participants — is the result of research done at UMR's Graduate Center for Materials Research. Rare earth alloys, particularly  $\text{SmCo}_5$  and  $\text{YCo}_5$ , are of great interest to the manufacturers and users of permanent magnets. Although yttrium has always been assumed to be non-magnetic, it was believed that yttrium played a significant role in the magnetic properties. University researchers K. Hardman,

graduate student; Dr. W.J. James, professor of chemistry and senior investigator for materials research; and W. Yelon of the University Research Reactor in Columbia, report the first experimental evidence for a magnetic moment on the yttrium atom. Their neutron diffraction studies confirm the theoretical predictions of researchers in the chemistry department at the University of Pittsburgh.

These results, which for the first time reveal the role of yttrium in affecting the magnetic properties, should assist in the development of better permanent magnetics.

The meeting is an extension activity of UMR's chemistry department and is co-sponsored by ACS and the St. Louis section of ACS. General co-chairmen are Drs. D. Vincent Roach and Samir B. Hanna, professors of chemistry at UMR.

## Conroy Performs

SOURCE: OPI

Jack Conroy, author, editor, critic and humorist from Moberly, will lecture twice at the University of Missouri-Rolla Tuesday, Nov. 8.

Conroy is classified in a New York Times review along with Mark Twain, Sherwood Anderson and Ernest Hemingway as one of a line of "Great Inland Prose Pilots." He will speak first as guest lecturer in the series "An Appreciation of the Arts of Missouri." The lecture begins at noon in Centennial Hall, University Center East. His topic on this occasion is "Personal Reminiscences and Anecdotes."

At 3:30 p.m. the same afternoon he will speak on "Early Mining Days in Randolph County" in Room 107 Mining Building.

Conroy was born in 1899 in Monkey Nest Coal Camp in Randolph County. After a distinguished career as an author, he has retired to a home in Moberly, the Randolph County seat.

His best known book, "The Disinherited," was first

published in 1933. It is a graphic account of a Missouri boy's experiences during the depression with emphasis on working class life.

Conroy has written other books — among them "A World to Win" and "They Seek A City" — several shorter pieces and juvenile stories. He served several years as editor of literary magazines which published material from then little known writers such as Richard Wright and Frank Yearby and early writings of Erskine Caldwell, Kenneth Patchen, Karl Shapiro, Nelson Algren and Benjamin Appel. From 1947 to 1966 he was senior editor of New Standard encyclopedia.

Conroy's appearance on campus is sponsored jointly by UMR's humanities department and the department of mining, petroleum and geological engineering. He was scheduled to lecture at UMR last spring but had to postpone until this date because of illness in the family.

Both lectures are open to the public and there is no admission charge.

### Missouri Miner Staff

The MISSOURI MINER is the official publication of the students of the University of Missouri at Rolla. It is published weekly at Rolla, Missouri. This MISSOURI MINER features activities of the students and faculty of UMR.

Typical coeds and their dates? No, it's just some of our better-costumed Miners who celebrated Halloween last weekend. Of all the Halloween parties, all were well attended with costumes that showed originality and hard work. Darth Vader was the most popular "person" winning best-dressed at Delta Tau Delta and Sigma Phi Epsilon.

(Photo by H. Burford)

## Halloween Spirits

By ED LATIMER

With Halloween just over, I've been hearing a lot of talk about how much it's changed, how it wasn't so much fun anymore, how it was a time for delinquents to roam, etc. Most people hear these things and say, "Yeah, it's changed quite a bit," without stopping to think about it.

Granted, there have been a lot of changes in the basic Trick or Treat policy. Now the mothers don't feel safe to send out their little children alone and walk with them because of all the kidnappings and molestings. Now every item received at a house must be inspected before consumption because of the razor blades in apples, sour candy, etc. Now all children must quit Tricking and Treating earlier in the night because of the vandals and trouble-makers that come out later in the

evening. And so what if some grocery stores have sales on eggs and toilet paper one week before Halloween, and as a result many people spend Nov. 1 cleaning up their yard and house (one person even started selling "TP Insurance" Halloween night to homes)? And so what if the kids start getting a little more daring like the one goblin who came up to our frat. house and said:

Trick or Treat,  
Trick or Treat;  
Give me something  
Good to eat.  
'Cause if you don't,  
I'll be a louse;  
And I'll come back  
To egg your house.

And so what if parents won't leave their house Halloween night, afraid of what might happen to it? Does this mean the spirit and fun have gone completely out of Halloween? Or are these just changes that

occur because of the changing times?

Friday night as I watched the beaming faces of children at the IK Halloween Party, and Monday night as I gave out candy to little children whose smiles glowed from underneath masks, I found the answer.

## Change In Time

SOURCE: OPI

With the change to standard time, viewing hours at the weekly open house at the University of Missouri-Rolla Observatory have been moved ahead one hour to 7 to 9 p.m. each Friday evening.

Student members of the UMR Astronomy Club invite the public to come take a look at the night sky on Nov. 4, 11 and 18 (no viewing session on Nov. 25 because of Thanksgiving vacation).

According to the group's president, David Lanteigne, there are several objects of interest to see in November. They include the planet Jupiter and its four major moons, the

Andromeda galaxy and its companion galaxies, the Ring Nebula in Lyræ and several star clusters and binary star systems. The moon will be visible during the viewing session on the 18th. Club members will be on hand to assist visitors with the telescopes and other equipment and to discuss the sky objects.

Earlier viewing hours should be more convenient for younger children, but those under 12 must be accompanied by an adult.

The observatory is located on a parking lot at the northwest corner of the campus. The Friday open house is for the public — with no admission charge — whenever the weather permits viewing.

## The Devil's Adversary

# What's In A Gift

By MARK MARIKOS

What is your reaction when someone gives you an unexpected gift? If you are like most people, you are thankful, yet curious as to the reason for the gift. It's a natural reaction because we have been conditioned to give gifts only in reward of some achievement, or to secure favor (or favors). What if the giver of the gift says that the only reason for the gift is simply that he wants you to have it. Most of us would be immediately suspicious — "What could be his motive?"

It becomes obvious that there is a difference between a reward or bribe and a gift. The giver may even say that you don't deserve it but he is going to give it to you despite that fact. That certainly eliminates the possibility of it being a reward. He may also say that there is nothing that you can give him that he needs or wants — can it then be a bribe? There is only one possibility left — that it is a gift given merely out of generosity.

In the Bible there is a word

that is used with that meaning — the word "grace". The word grace implies an unmerited favor. In the last article we saw that man definitely has not pleased God, but has disobeyed Him. We also know from the Bible that God is the creator of the universe. Surely we have nothing that He needs; anything we have is already His. Therefore there would be no reason to reward us or to bribe us, yet he still gives us His gift of grace.

Why does God, in His infinite wisdom and Knowledge, do something that seems so completely illogical? First we must recognize the difference between human logic and God's logic. Human logic is based on what we can gain by doing something, or on our nature. God's logic is based on His nature — namely that He is a just and loving God. He knows that because we have been disobedient, that we are deserving only of death. He demands justice. Yet He loves us so much that He made the

sacrifice needed to pay that penalty so that we would not have to. He has given us the grace gift of life, when all that we deserved was death.

Like any other gift it can do us no good unless we accept it. Let us say that a rich relative gave you a checkbook and told you to write as many checks as you wanted for any amount and that he would cover all of them. If you did not believe him and refused to write any checks on that account the gift would do you no good. The account would still be in your name yet because of your refusal to draw upon it you would render it useless. God's grace is like that. It was given nearly two thousand years ago when Jesus of Nazareth died on the cross in your place and arose to conquer death. You now have the choice to accept or reject the gift. I hope that you have or will choose to draw upon that account of righteousness that He has given to you. I hope that you will write a check for life eternal.

Oriental flower arranging was the subject of last week's SUB Workshop. Many different greens and florals were combined in traditional Far-East fashion.

## Film Winners Available Through Bell Systems

The winning films in the Academy of Motion Picture Arts and Sciences 1977 Student Film Award Program are now available free of charge from Bell Telephone Companies or the American Telephone and Telegraph Company for showing at universities and colleges. The four year old program of the Academy of Motion Picture Arts and Sciences and the Academy Foundation was established to recognize the top creative talent among the country's ever-growing body of student filmmakers. The program has been co-sponsored by American Telephone and Telegraph Company for the past three years.

The program is designed to be shown to campus-wide audiences through the sponsorship of either student organizations or departments of film and/or communications. A Bell System speaker is usually available to accompany the film and answer questions about the contest and programs.

This year films in four categories were honored. Carol Dysinger of New York University won the Dramatic Achievement Award for her film "Sixteen Down", concerned with the growing pains of a young girl coming to grips with broken home. Ms. Dysinger and the other three Achievement Award winners — Frank H. Binney of the University of Texas at Austin for his documentary "The Last of the Little Breweries", Phillip W. Pura of Boston University for his experimental film "TRANSCENDANCE", and Paul Demeyer of the California Institute of the Arts for his animated film "The Muse" —

all received \$1,000 each and a special trophy, plus the opportunity to have their winning films included in a special presentation that AT&T will present free of charge on college campuses across the country in the fall. A fifth winner in this year's competition, Rob Williams of Western States Film Institute-Metropolitan College, won a \$500 Merit Award for his documentary

"Guitar Craft".

Requests for the film, which are printed on two reels with a running time of 72 minutes, should be made by writing Student Film Awards, England Strohl Associates, Room 507, 133 East 58th Street, New York, New York, 10022 or by contacting the public relations department of the local Bell Telephone Company.

## Phobia Phollies

By DEBBIE MEISTER

The National Challenge, appearing weekly in the St. Louis Post-Dispatch, challenges the readers to a new contest each week. One such National Challenge was "to invent an unusual phobia."

First prize went to Stephen Schuck, Wheaton, Md. for his unusual Ritphobia: fear of dyeing; and also to Farrah-

phobia: fear of acting from Mark Cozenza, North Riverside, Ill. Second prize, for vwlphb: fear of vowels, went to Noreen Principe, Springfield, Mass. and to Tim Philibosian from Denver for the unusual Philibosianphobia: fear of seeing my name in print.

Attending UMR is apt to subject certain individuals to all

kinds of new and "unusual phobias." The Miner challenges YOU, any UMR student, to submit your own Miner Phobias to the Miner Paper. Bring your phobias in an envelope to the Miner Office mailbox (T-1), addressed to Features Editor, by Nov. 10, 1977 and don't forget to sign your name, home town and major. The best entries will be printed in the Miner Paper in two weeks.

To help spark your imagination, here are some honorable mentions from the St. Louis Post-Dispatch National Challenge: Antiaphobia: fear of fruit - Bob Arrole, Tucson, Ariz. Phastphoodphobia: Phear of not having it your way - Nancy Rosenberg, Springfield, Va. Titanicphobia: fear of ice cubes - David Stern, Boca Raton, Fla. Aphobia: fear of nothing - James A. Redmond IV, St. Louis, Mo.

Start now and meet this challenge with the most outrageous phobias you can think of.

Nan Bert and company performing at SUB Coffeehouse last Friday.

## Ediletters

### STATEMENT OF POLICY

The opinions expressed herein do not necessarily represent the opinions or policies of THE MISSOURI MINER. The "Ediletters" section is the sanctuary of the general public. All letters submitted will, as in the past, be printed in the unaltered and original form when space in this newspaper permits.

### Editorial Rebuttal

To the Editor:

In the October 20th issue of the Missouri Miner, Features Editor, Brian Kavanaugh raised several points concerning the procedures of selecting a Homecoming Queen for UMR.

The Student Union Board would like to take this opportunity to clarify and correct some of Mr. Kavanaugh's statements.

The policy of having only a UMR student as a Homecoming Queen candidate did not mystically appear. The matter was discussed at length in committee for several weeks. It was brought up before the SUB officers and directors in November as well as discussed in all the committees, and the board decided that this decision, being part of the Homecoming Festivities could best be decided in the Special Events Committee. It was at this same meeting that a question concerning this issue was proposed for the Fall '76 Student Survey.

The results of this survey, handed out in late January showed that 42.9 per cent of the students who returned these questionnaires (a mere 301) were in favor of a UMR student being Homecoming Queen and 6.3 per cent giving no reply at all.

It was not until two weeks later that the Special Events Committee actually made the final decision on this matter. With 90 per cent of the Committee present (at the time, Special Events was the second largest committee in SUB), a motion was overwhelmingly passed to restrict the candidates for Homecoming Queen to UMR students.

It is not now, or never has been, the policy of the Student Union Board to bring any of it's programming decisions "to a general student vote." Student opinion is solicited through questionnaires and all students are invited and encouraged to

join SUB. Applications are available at the candy counter and in the SUB office, 217-218 Old Student Union.

Hopefully, this will clear up any misunderstandings students have concerning the procedure in arriving at the decision to have a UMR student represent her school as Homecoming Queen.

Sincerely,  
Pat Mudd

Vice President of Committees  
Student Union Board

### Recognition Deserved

Dear Editor,

Many athletic teams representing UMR do not get the recognition that the larger sports do. One of these is the women's volleyball team. I would like to take this opportunity to express my appreciation to the members of UMR's volleyball team.

No, they did not win enough games to go to the state tournament but no other team in the state has only 6 players. The promise the team showed at the beginning of the year was lessened by the loss of some players who had made the team. This made it all the more difficult for the remaining 6 players. Yet with this setback they went on to put on a good showing for the rest of the season.

A particular note of thanks to one of the main cogs in the machine, Joy Ewens. Joy has spent much of her time and energy representing UMR on women's varsity teams. Joy is an excellent volleyball player who at the end of this volleyball season has come to the end of her outstanding collegiate athletic career.

All 6 players have put a lot of time and effort into the volleyball team since early in the semester. When you see any of the girls on campus, let them know that their efforts have not

(cont. on p. 8)

## Spotlight

### on Professor Emeritus

By KAREN DOWNER

No, Professor Emeritus is not UMR's new chancellor. Professor Emeritus is a designation that honors retiring members of the faculty.

According to the rules of the university, the title of "Professor Emeritus" is granted to any member of the faculty of regular appointment and in full professorial standing when he retires. Also, he must have been a member of the faculty for at least fifteen years, or been a full professor for at least five years. He must retire in good standing, either at the age recommended by the Board of Curators, or at voluntary

retirement at or after the age of 65.

Other retiring professors who aren't covered by the preceding rule may be referred by the dean of his division. The Committee on Honorary Degrees screens these referrals and may recommend the awarding of the emeritus title to the Chancellor, who in turn, may make a recommendation to the President and Board.

A Professor Emeritus remains as a non-voting member of the campus faculty, and his name appears in the list of Officers of Instruction and Administration in the university catalog.

Administrative officers may

be recommended by the Chancellor or the President for the emeritus title.

So far in 1977, three professors have retired as a Professor Emeritus: Wm. Webb (Chemistry), J. Johnson (Elect. Engineering), and J. Brewer (English). Johnson is also Dean Emeritus of the School of Engineering. Gale Bullman, for whom the Multipurpose Building was named, was a Professor Emeritus of Physical Education.

So, if there's a professor who's been feared in his department for years, he will still be a member of the faculty if he retires a Professor Emeritus.

## Talent And Fashion - Hand in Hand

By LINDA MARIE PONZER

For those of you who missed the annual SUB Talent Show and Fashion Show last Friday night, you missed a real good evening of free entertainment. The fashion show which is usually held on a different night, was for the first time held during the talent show. It was a purely enjoyable presentation of today's fashions.

The first set of talents performers included three small groups. The first one was led by Mike Monrotus on the guitar and included the voices and accompaniment of Karen Eaton, Janette Phillips and Tom Rosenauer. The group had good harmony, but due to difficulties with their use of the mikes their

sounds didn't reach the whole audience. Also a bit more practice would have enabled the singers to sing without their words written on paper. Their, almost last song, "For Baby" came through extremely well and was received with a large round of applause.

The second group during the first set consisted of Nanette Bert, John Gillespie and John Rentz. Starting off with a really good version of a Joan Baez song, "Diamonds and Rust," this trio went on to perform both folksy tunes and blues to show their versatility. Nanette's voice could only be described as a refreshing break from the traditional deep throated blues and country of most of the show.

While the third group was setting up their equipment, the cafeteria was flooded by a bunch of transfer students from another galaxy. Such figures as Darth Vader, Luke Skywalker, Death, and other favorites came boldly through the audience. Following such an interesting situation was not an easy task, but Bart Smith's group carried it off. Bart's group consisted of Steve Gwinn and Dennis Haley. They performed old country tunes using the hammered dulcimer, mountain dulcimer, guitar and harmonica.

Between the first and second sets the crowd got their first

**Queen**

**Controversy**

Dear Editor,

Concerning the controversy over the Homecoming queen candidates, I would like to make a few comments on this particular issue and a few others facing SUB.

As soon as the Special Events Committee passed the by-law requiring the queen candidate to be a UMR coed, the board of officers and directors took decisive action. After a heated debate on the subject at the next board meeting, the vote on the subject revealed that the board wished the by-law to stand as is, until such time as the committee would revise or repeal its decision on the candidacy of the Homecoming queen. The officers and directors of SUB realized that the decision would definitely be unpopular; however, we felt that the repercussions of stomping on the committees and telling them how to run their own shows would have even more disastrous effects. First of all, the shock effect of the ruling was such that all of SUB would get a boost from the atmosphere of controversy. Apathy, it was hoped, concerning all Homecoming events would vanish; and that is exactly what happened this year. UMR had one of the best Homecomings ever with tremendous student input into the events. In fact, the Special Events Committee is very high in morale due to the lack of apathy and large amount of controversy. Certainly this condition will spawn more ideas and excitement in the committee's future leadership. Secondly, if the board of officers and directors had decided to change the by-law themselves, a very important precedent would have been set for the future. The board could then meddle in the affairs of all the committees without any regard for their membership and valuable ideas. I think everyone will agree that if someone tells you incessantly that what you have done is wrong, when it is in your opinion, very right; you tend to lose interest in that person. SUB's officers and directors felt that telling the committees what they can and cannot do will cause the members of that committee to just quit in disgust. If you feel that may have been the best solution, think again!! Do you honestly think those members would promote SUB's best interests? Most certainly, they would criticize the leadership and destroy SUB's credibility as an organization that cares about building leaders on campus and, later, in industry. Also, if the present leadership is criticized, the little man on the bottom will feel as if his place in the organization is that of peon, nothing else. In order for an organization to be effective, it must promote the individual member and, especially, his

decisions; no matter how unpopular they may be with the rest of the world.

Another issue that hasn't received as much attention is the concerts. Last year, when I directed them many people felt that we had too much country rock. Another feeling of the student body was that the Hamilton, Joe Frank, and Dennison concert was a flop due to poor management within the General Lectures Committee. While I won't dwell on those subjects as such because they are in the past, I will say that the board of officers and directors had many opportunities to interfere in

General Lectures affairs. Today, that committee has over 60 interested members and is increasing its programming as fast as possible.

Maybe General Lectures has a little more glamour involved, but why couldn't the same thing have happened last year when there were unpopular decisions made by these committees? If you feel that an unjust decision is being made by an organization, join it and make the appropriate changes. Don't sit in your easy chair and spout off!!

# The challenge.

Construct the mystery word in the boxes below. To do this you must fill in the correct missing letter in each of the words listed in the

columns. Then transfer the missing letters to the corresponding numbered boxes. Keep an eraser handy—it's not as easy as it looks!

## When there's a challenge, quality makes the difference.

We hope you have some fun with the challenge. Pabst Blue Ribbon is the Number 1 beer in Milwaukee, beer capital of the world.

That's why we'd like to offer you another challenge—the Pabst challenge. Taste and compare Pabst Blue Ribbon to any other premium beer. You'll like Pabst because Blue Ribbon quality means the best-tasting beer you can get. Since 1844 it always has.

**PABST. Since 1844. The quality has always come through.**

PABST BREWING COMPANY, Milwaukee, Wis., Peoria Heights, Ill., Newark, N.J., Los Angeles, Calif., Pabst, Georgia

Mystery word: REFRESHMENT

(cont. from p. 6)

view of the fashion show. The colorful phraseology set a very modern, off the cuff air for the whole show. The MC for the fashion show — whoever she was, had a fantastic sense of humor.

The second set was dominated by the presence of Tom Tanner. He played first a duo number with Janette Phillips, then later on a duo with Wink Zachritz, then did a solo spot. Each time he performed the audience saw a different side of his talent. With Janette, he performed soft ballads, with Wink he did classic "grade B" type material and he performed by himself on the banjo doing breakdown stuff and old country tunes on the guitar.

Also during the second set was the performance by Bob

Berri. He did such tunes as "Maggi," "Coming into Los Angeles," and "Get Up and Go." His best received number was the song "Green Stamps," the story of a grocery shopper who wanted more than asparagus tips from the produce girl and got just green stamps.

Doing his number also in the second set was Ben Smith. He presented the audience with a different message than most of the other acts. He sang of his Lord-Jesus Christ. He sang of the corruption of Uncle Sam. He also sang of Love. Ben involved the audience in the song; "Simple Song" with the chorus. All who listened to Ben's performance were affected by it, whether the message struck home or his smooth soothing voice reached their hearts.

The second half of the

Fashion Show now took place, in the same colorful, off the cuff manner.

The third and final set consisted of two soloists and one duo. The first act was Bob Sleffen and friend. Bob excelled in bluesy tunes and was pure enjoyment with his easy listening voice. Bob was joined by a friend who helped form this talented duo.

The second act of the last set was Brial Heackroth. He performed the songs; "Mr. Bojangles," "Long Time Ago" and "Diamonds and Rust." Brian's voice was very smooth and very well received.

The final act for the evening was the solo performance of Mike Peterson. Mike had the dynamic powerful voice of the veteran moody singer. He was the icing on the cake of a truly enjoyable evening.

## H. O. and A.

Hey! Que Pasa? Etc. Well, I guess if you don't have anything better to do, you might as well stick around and read this stuff, it beats Math 22.

As you remember from last week's column (YOU DID READ LAST WEEK'S?) I was holding forth on the subject of concerts and shows, and whether or not the show had become more important than the music. And since there's no reason I should bring the whole mess up if I didn't have an ulterior motive in mind, I maintain that the show has become more important.

Point: As the show becomes more and more involved, it takes a more and more complicated lighting system, and a more and more complicated effects system, etc., etc. In other words, the entire production gathers a momentum unmatched by anything short of a small army. The group may have some control over the initial conceptions and implementations, but, once the tour begins, there is no time for modifications, and less time for changing the basic set. Locked up tight.

Point: If the non-musical part of the show is indeed structured and channeled, so that it will look tight, then there is by necessity, no room for extended improvisations by the musicians. There simply is no room for the indeterminant in the modern rock package. If you've ever listened to "Live at Fillmore East" by the Allman Bros., you can see what I'm talking about without problems. For those of you that can't...

Point: Lighting, as the state of the art now stands, requires an additional member of the crew to control on-stage illumination from a remote position, usually from the sound stage in the audience. Unless this member is telepathic, or an exceptionally gifted musician (in which case he certainly wouldn't be doing lighting), there is no way that he can anticipate the actions on stage quickly enough to follow extended soloing and come back on the beat. YOU try it some time. I have.

Point: As audio systems improve, as discussed last week, the listener demands better and better presentations, in a musical sense. This has led to a situation wherein (it is written) the audience expects the live equivalent of the studio version of whatever is being played. Witness the "Welcome Back My Friends..." LP by Emerson, Lake & Palmer. For the most part, this album is a rehash of EL&P's earlier work. 'Live' no longer means jamming or new interpretations.

It is this new attitude that allows hacks like Kiss, Angel, and others of that ilk, to pass themselves off as 'hot' rock groups. This attitude has brought us the 'Illuminated Grou Logo'. This attitude has brought us dry, repetitious concerts like the Yes bash I panned two weeks ago.

The idealistic among us may still believe that music is the only important thing about concerts. The hype continues about the musical plaudits for bands, past and present. Regardless, when I listen to LPs like 'Live at the Fillmore East', and then to discs recorded live and released in the last two

years, I can only meet with disappointment.

What do I suggest, then? To suggest would be an attempt at control, and that would be defeating the original rock 'n' roll mystique.

What do I expect? I can't, or won't, say. It's up to the listener and concert-goer to say. Is the world of Modern Rock Music controlled by the Critic and Producer? I hope not, but I'm increasingly afraid it is. Once again, the lure of the fast buck is gnawing like a cancer at what was once a new and vibrant art form. Can the consumer control the music market, does the consumer have any control over the music market? I think not.

What will be next? Will Disco conquer and rule? Will expediency change the concert into a movie? I don't even know if the Big Decision has been made, much less the answer. In five years, I'll know the answer, but the question will no longer be the same. In the meantime, I'll put on a John Coltrane album, and ignore the whole damn thing.

Next week, campers.

Ward Silver

## One More Time

What can you say about a performer that keeps coming back, always attracting an over-capacity crowd, except — he is great. Saturday, November 12, will mark the fourth time John Biggs will perform at a SUB Coffeehouse here at UMR. John made his initial professional appearance here at UMR in 1972. He has since made three more. He will again entertain the students here on the 12th at 8:00 p.m. in the Old Student Union Cafeteria.

John has that rare ability to combine a sweet folksy ballad with some hard banjo and guitar picking and mixes in the strong clear, heart warming voice he was gifted with. Between songs, John will tell a yarn or story from his vast repertoire of them. He has a way of warming up to his audiences and making them feel like they are his best friends and that they are just sharing in some good times.

As you can gather by his many return engagements...whether in club, coffeehouse or concert...John Biggs is an entertainer very much this side of an enjoyable evening.

## Defense Leads Miner Rout Of Bearcats

By BILL FRANK

Terry Ryan reached the 1000 yard rushing plateau and the Miner defense was awesome as UMR trounced the Bearcats of Northwest Missouri State 27-6 Saturday at New Jackling Field. Ryan's 124 yard effort on 28 carries gives him a total of 1033 yards in eight games. He is second in the MIAA only to Steve Powell of Northeast. The Miner defense harassed Northwest's quarterbacks all afternoon, sacking them five times for 40 yards and intercepting them three times. The superb defensive line, led by Greg Elzie, Andy Lain, and Joe Kinsella, was mainly responsible for the heavy pass rush and for holding the Bearcats to only 134 yards rushing.

This victory gives UMR a 3-1 MIAA record going into next week's contest Saturday at home against Washington University. The Miners will resume conference action on November 12 when they travel to Cape to battle league-leading Southeast Missouri State. Southeast upset Kirksville last Saturday, 10-0, so the Miners are still very much in contention for the crown. Cape will take on SMS this weekend, and Northeast should have an easy time with Central, so Cape will probably still be in the lead when they host the Miners. Northwest will try to improve their 1-2-1 record when they host Lincoln University.

The Miners threatened on their very first possession Saturday, but Tom Rosenauer's 30-yard field goal attempt sailed wide. Rosenauer had a very shaky day, missing twice from inside the 30. Early in the second quarter, the Miners needed a 43 yard field goal, so they called on kickoff man David Weaver, who made good with an impressive kick.

Gary Misak recovered a fumble in the first period, one of three for Northwest, and gave the Miners good field position at the Bearcat 40. The Miners marched in on eight plays and Kenny Vaughn dashed the final three yards and the touchdown. Rosenauer converted and the Miners led 7-0.

After a good kickoff and excellent coverage by the kickoff team, the Bearcats were

forced to start their next series from their own 10. The Miners defense played it tough again and muscled Northwest into punting from beneath their own goalposts. Craig Heath returned it 28 yards to the NWMS 23 yard line. Heath had an excellent day on returns, totalling 87 yards on 4 punt returns, his longest being a 58 yarder in the first quarter. He also had 22 yards on one of the two Northwest kickoffs.

The unstable Miner offense could not move the ball and Rosenauer missed his second 30 yard attempt, and the Miners didn't capitalize on another great set up provided by the defense and the specialty teams.

Early in the second quarter, UMR's kickoff man, David Weaver, came in to kick a big 43 yard field goal against a varying wind to give the Miners a 10-0 lead. At the half, the Miners still only had the 10 point lead, in spite of seemingly dominating the first two periods. First impressions were misleading, however, as UMR had only mustered exactly 100 yards offensively. The specialty teams were the only ones to come through with any spectacular performances in the half. They totalled 123 yards on all returns and held Northwest to less than 30 yards total.

While the Bearcats tried to regroup and the Miners sweated their 10 point lead, the crowd was entertained by the Zizzers of West Plains High School.

The third quarter was the big one for the Miners as they scored 17 points and put the game out of reach. The deluge began as Terry Ryan dashed 25 yards for a touchdown to cap a Miner drive halfway through the quarter. As a result of the heavy pass rush put on by the Miner front four, Kirk Mathews, NWMS' quarterback, was forced to scramble out of the pocket several times. In the second quarter, he was injured on one such play on a gang

tackle by the UMR secondary. Replacement Mark Smith offered up Northwest's second intercepted pass on the next series, and Steve Teter nabbed it.

Unfortunately, the Miner offense failed again, and neither side could muster any serious offensive threats for the next 8 minutes. With three minutes left, the Miners resorted to the tricky flea-flicker play to net their next score. Vaughn pitched out to Craig O'Dear, and then headed down the sideline. O'Dear stopped and passed it to Vaughn for a 41 yard touchdown play. With Rosenauer's kick, it was UMR 24, NWMS 0.

Don Renner intercepted a pass on a fake punt by Northwest and returned it 50 yards to the Northwest 12. Again the offense could not capitalize, and after a crucial 15 yard penalty, were forced to settle for a 36 yard field goal, again by Dave Weaver.

Northwest managed a drive late in the game and pushed across their only touchdown with less than a minute left. Smith passed to Dave Scott for eight yards and the touchdown. The conversion attempt was no good.

Enough cannot be said of the efforts of the specialty teams in Saturday's game. The consistently good field position that they gave the offense, and the Miner's excellent defensive show combined to shut down the Bearcats and dominate the course of the game.

Ryan's 1033 yards is a new season record. Kenny Vaughn is still the leading passer in the MIAA with 1386 yards with a 43 per cent completion mark. Once again, Saturday the Miners will host Washington University at New Jackling Field at 1:30 in a nonconference game.

Score by periods:  
NWMS 0 0 0 6-6  
UMR 7 3 17 0-27

### Note to nameless sports fan

The predictions offered by Brian Edwards are simply his personal opinions. If you feel your team has been slighted; well — prove it on the field or athletic competition — not by writing silly letters to the sports editor. Brian's predictions won't keep your team from winning — nor will they make anyone else's team win.

## Seasons Ends On Winning Note

By MAUREEN MURPHY

The UMR women's volleyball team ended its season this week with several exciting games, both on the road and at home. On Wednesday, Oct. 12, the lady Miners played Evangel College out of Springfield and after a couple of close games, Evangel came out on top with scores of 12-15, 7-15, 10-15. Going to Jefferson City on Wednesday, Oct. 19, the Miners showed great style by wiping out Lincoln U. with scores of 15-4, 15-5, and 15-2. In a dual meet on Saturday, Oct. 22, Stephens College at Columbia took the first match, 10-15, 12-5 and 13-15 against UMR. In the second match between UMR and Lincoln, Lincoln made a surprising comeback and won it only after the match went into 5 games. The scores were 14-16, 15-9, 15-5, 11-15, respectively. The lady Miners had another dual meet ahead of them at Columbia College, Oct. 24. It was a very honest effort made by the team and the determination proved to be well worth it. The Miners took the first match against Columbia

College, but the victory of the second match between UMR and Stephens Methodist College was in Stephen's favor. The Miners didn't give up, however.

On Oct. 29, the lady Miners hosted Colver-Stockton and Lindenwood College in their last dual meet of the season. The Miners fought hard with their spirits high, this proving to be the better team. It also was an important game to the lady Miners, especially to senior Joy Evens. The team dedicated this last meet to her since it would be ending her volleyball career here at Rolla. Joy has been with the team since it started and

has proved to be a great asset to the team. The Miners came out on top against Colver-Stockton, 15-3 and 15-3. Lindenwood couldn't pull a win over on the Miners, either, the scores being 15-5 and 15-9.

Our final standings for the season were 9-16. The numbers don't really have a great significance to the Miners, because they know the hard work determination it took to play the last half of their season with only 6 players. We really appreciate the way the team stuck together till the end. Good luck to the returning players, for an even better season next year.

## M-Club

### athlete of the week

This week's M-Club Athlete of the week is Terry Ryan. Terry broke two UMR rushing records this weekend as he carried the ball for 124 yards. First he broke his own single season rushing record of 927 yards by being the first UMR back ever to gain over 1000 yards in a season. Second Terry broke the career rushing record by going over the 2000 yard mark.

M-Club would like to recognize the Miner offensive line who is responsible for most of Terry's yards. Steve Henry and Rick Shoars have been doing a fine job at center. Brian Tepper, Perrin Roller and Ralph Wetherspoon have all performed well at guard, while John Moles and Steve Curran have done an excellent job at tackle.

Congratulations Terry.

## Cycling Results

The UMR Cycling Club and the Intramural Department sponsored the intramural bicycle time trials which were held Sunday afternoon, October 9. This event was held on the north outer road east of Highway V, going toward St. James. The route was 10 miles of strenuous riding for the men. The women's course was 5 miles of the route.

The average speed for the top ten riders was 19.98 mph. The top ten times for the organizations are:

- 1-GDI-29:39
- 2-BSU-30:48
- 3-MRHA-31:24
- 4-Delta Sig-32:38
- 5-Beta Sig-34:17
- 6-Sig Tau-34:23
- 7-Campus-34:45
- 8-Phi Kap-34:57
- 9-Kappa Sig-35:32
- 10-Theta Xi-37:36

The top five individual scores for men are:

- Dave Sorrel 28:00 Delta Sig
- Bob Bellora 29:25 GDI
- Mike Ludwig 29:45 MRHA
- Marty Hoffman 29:51 BSU
- Ben Humphries 29:53 GDI

The top two woman scores are:

- Jill Burgi 16:43 AWS
- Rita Weber 17:11 Zeta Tau Alpha

## TKE Wins Tennis

By BRIAN EDWARDS

Tau Kappa Epsilon Fraternity is the overall winner of Intramural Tennis.

TKE's doubles team took second and their single competitor finished fourth for a team score of six. MRHA, who finished second, was two points behind TKE as their singles team finished third and their doubles team came in fifth to give them a team score of eight.

Competing for TKE as usual in the singles division was Ron

Jansen, and in the doubles competition was Bill Frank and Mike Beckman.

The top individuals in the doubles competition are D. Diestelkamp and R. Murphy from Sig Tau. In second of doubles was TKE, Beta Sig was third, Sig Nu fourth, and MRHA and Sig Ep tied for fifth.

The top singles competitor is still undecided between Eric Meyer of TEC and Chandler of TJHA. MRHA finished third in singles, TKE was fourth, and Campus and GDI tied for fifth.

## Intramurals Standings

## "How come there's a piece of cheese in my fish sandwich?"

When we invented our first Filet-O-Fish sandwich, we knew we'd made the best fish sandwich ever. The mild fish we'd searched the oceans for tasted just right, breaded and cooked up flaky and tender.

And our creamy, secret tartar sauce recipe gave it just the zest we

wanted. Why, we'd even discovered that it tasted most tempting on a steamed bun.

So, when we served it to the Chairman of the Board, we were amazed when he said, "You know, this does taste very good. But it'd taste incredible with a half a slice of

cheese on it." We knew he was wrong. But we tried it anyway. And guess what? He was right. That's why there's a half slice of cheese in our incredibly delicious Filet-O-Fish sandwich.

And, why our Chairman of the Board is Chairman of the Board.

We do it all for you.

# Ever notice how it's easier to ace the courses you like?

It finally comes down to commitment.

When you don't like a course, it's hard to excel. The class gets tedious. The texts get boring. The lectures get dreadful. Your work suffers. And so do your grades.

Compare that with the courses you really believe in. You care more. You try more. And without even noticing, you just naturally do better.

It's true in school. It's true outside of school.

For example, we believe there's just one way to brew Busch beer. The natural way. With natural ingredients. Natural carbonation. Natural ageing.

We believe that's the best way to brew a beer.

And when you believe in what you're doing, you just naturally do it better.

Taste a Busch and we think you'll agree.

## BUSCH

When you believe in what you're doing,  
you just naturally do it better.
